THE IP BASED VIDEO-SURVEILLANCE SOLUTION IMPLEMENTED BY SECUTECH ARABIA SECURED FESTIVAL SITE THROUGH W/L P2P LINKS ACROSS ENTERTAINMENT ARENAS

SecuTech Arabia

Founded in 2004, SecuTech Arabia is one of the leading Commercial Security Designer & Solution integrator in Saudi Region. Offering Solutions such as P2P based Video Surveillance Systems to managing Realtime Traffic Data & from provision of Unified Security Solutions to Cybersecurity implementation, SecuTech Arabia is maintaining over 900 trusted clients across Saudi Arabia !

Customer's Challenge

Jeddah Seasons Project selected KASC (King Abdullah Sport City Complex) for their Al Johara Festival site. KASC is a World Class Sports Arena where Network Infrastructure meets the highest standards developed & maintained by Aramco. IP Camera Infrastructure had to meet the high quality standard requirements set by the Client as well as KASC Arenas!

Solution Offered

Divided in 4 Zones, Al Johara (KASC) was offered Wireless based infrastructure for IP Cameras Network. Hence 8 Air Fiber Links were installed across 4 Zones. Which were then connected to a control room facility maintaining full hardware redundancy. Almost 80 Voltro (UK) IP Cameras Network delivering FHD Resolution in 5 MP Format were installed to meet the security requirements.

Solution Advantages

The implemented Voltro's IP Camera solution over a wireless network offered high image-quality & availability. Based on a state-of-the-art compression format that optimizes and adapts to available bandwidth, Voltro's smart system tools made it easy to customize and automate NVR's maintenance and supervision tasks that reduced the management resources required Big-Time.

Customer's Word:

"SecuTech Arabia implemented their Security Solution based upon the standards set by Jeddah Seasons as well as the King Abdullah Sports City Complex. We proudly partnered with SecuTech Arabia delivering a Safe & Secure Festival Project in Al Johara !"

Amin Yamani,
Director - IT, Jeddah Seasons
